**DETAILED ACTION**

***Election/Restrictions***

Claims 12-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claimed specie, there being no allowable generic or linking claim. Election was made with traverse in Paper No. 7. Claims 12-13 are drawn to a species not included with 6-11 and 14-15.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-11 and 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shibasaki et al. [5684673] in view of Tsukada et al. [5864463].

Shibasaki et al. discloses an apparatus [figure 7] comprising:

a housing [12] sized to be accepted by a housing port of a portable electronic device, the housing having an interior portion; and

a hardware interface connector [13] positioned within the interior portion of the housing to be accepted by a hardware interface port [40] of the portable electronic device.

Shibasaki et al. disclose the instant claimed invention except for: the specific pin connector used for the interface between the housing and the portable device the connectors made thereto.

Tsukada et al. teaches a 120 pin connector [24] formed of two 60 pins rows [figure 3].

It would have been obvious to a person having ordinary skill in the art at the time invention was made to use the pin connector of Tsukada et al. for the interface of Shibaski, for the purpose of providing multiple functions and signal paths.

Shibasaki et al., as modified, discloses the claimed invention except for the specific pins selection. It would have been an obvious matter of design choice, absent evidence of criticality shown in the present invention and the lack of implicit or explicit limit to a specific design in the prior art, that the pins could have been selected based on the specific interface desired, since applicant has not disclosed that any specific pin selection solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with alternate pin selections dependent upon the interface.

Regarding claims 14-15, the claimed method steps would have been obvious in the product structure.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bang et al. [US 6,219,232] disclose a Computer Having A Drive Unit Unifying An FDD And A CD-Drom Drive.

Klein et al. [US 6,205,021] disclose a Method For Operating An Input Device And A LapTop Computer.

Helot et al. US 6,185,095] disclose a Computer Docking Station With Retractable Release Lever.

Anderson [US 6,166,917] discloses a Techniques Of Assembling Modular Electronic Equipment.

Bryant et al. [US 5,995,621] disclose a User Installed Telephone Option Module.

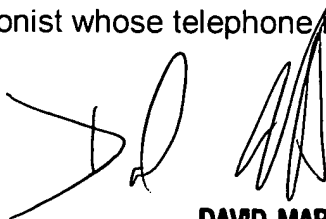

Shich [US 6,122,175] disclose a Compact Flash Card Adapter.
